DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Japanese No. 7-195136 (Mikito hereafter).

Cavities 51, 52 in the Mikito cast workpiece 50, into which tools 63, 64 are inserted in the forging of Figure 8, are formed by a means 13 in the casting apparatus 10 of Figure 3. Mikito advises that the Figure 8 forging is performed after heating of the workpiece, or with the workpiece retaining the heat of casting.

It would have been obvious to one skilled in the art to perform the preheating of the workpiece suggested by Mikito in an admittedly conventional tunnel furnace, as required by this claim, merely as a utilization of knowledge clearly present in the art since Applicant has no disclosure that any particular type of heating means is critical to the successful practice of the invention.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 2 is rejected under 35 U.S.C. 102(b) as being anticipated by Mikito.

Cylinder means 40 of Figure 6 are used to deploy the rods 63, 64 of Figure 8.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Rigby further shows the state of the art.

6. Any queries regarding this Office action should be directed to the undersigned Examiner whose phone number is (703) 308-1873 and fax number is (703) 305-9835 (draft papers) or (703) 305-3579 (formal papers).
